

AMENDMENTS TO THE SPECIFICATION

**RECEIVED
CENTRAL FAX CENTER
JUL 27 2007**

Please amend the specification as follows:

As shown best in Figs. 7-9, the bridge 16 may be substantially C-shaped. The bridge includes a generally rectangular central portion 38 between first and second ends [[40 and 42]] oriented downward to the central portion when fitted into the open end of the container body. The central section 8 defines the dispensing aperture 18a-18m. The bridge 16 may be press fit into the upper open end of the container body 12. The bridge may be held in place at the inboard sides of the walls at the upper portion of the container body 12. For example, the bridge may span between the front and rear walls of the container body or between the two sidewalls 30. The bridge 16 is removably mounted to permit access to the interior of the container body 12. This improved feature is helpful to access a wipe within the container body (i.e. a wipe not drawn through the stack of wipes). Alternatively, the bridge 16 is sized to define a finger gap between the bridge and the walls at the upper portion of the container body for the user to insert a finger and grab onto the leading edge of a wipe within the container body. The bridge 16 is thus easily removed to permit access to and replacement of the stack of wipes.
